

Toothbrush Holder

Finished size for a pocket 5.5" x 6.5" (14 x 16.5 cm). Our toothbrush holder is made of 2 pockets but you can add as many as you want for storing small things in the bathroom.

Sewing Supplies

- Plastic, for each pocket 8" x 13 3/8" (20 x 35 cm)
- Black sewing thread
- Sulky 40 wt. Embroidery thread
- 6 Eyelets
- 4 small rings
- Husqvarna Viking Tear-Away™ Stabilizer
- Husqvarna Viking Embroidery card/disk/d-Card 43, Design Winners by Swedish Art Students.

CUT

One square, 8" x 13 3/8" (20 x 35 cm) for each pocket.

EMBROIDER

Select a design to embroider. We have embroidered design 1. Mark the center point for the design centered, 3 1/4" (8 cm) from the upper edge. Hoop the plastic in the hoop with Tear-Away™ stabilizer. Pull carefully but do not tighten the screw too much to avoid marks in the plastic. Embroider the design.

Cut down the width of the pocket to 5.5" (14 cm).

SEW

Snap on presser foot H. Touch vinyl on your Sewing Advisor. Select straight stitch, stitch length 2.5 – 3.0. Fold the short edge above the embroidery 3/8" (1 cm) to the inside. Stitch 1/4" (6 mm) from the edge.

Fold up the embroidered side 5.5" (14 cm) and sew along the sides to create a pocket.

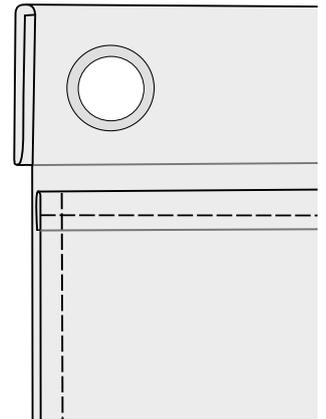

Fold a 3/4" (2 cm) wide, double hem to the wrong side of the plastic above the pocket. Fasten the "hem" with an eyelet in each corner through all layers.

Attach eyelets in the lower corners of the upper pocket and connect a small ring in the eyelets.

Sew a second pocket in the same way but leave out the eyelets in the lower corners.

Fasten rings in the upper corner eyelets of the lower pocket. Connect the lower and upper pocket rings.

You can sew as many pockets as you like. Remember to leave out the eyelets in the lower corners of the lowest pocket in the row.
